

Request for Proposal

Introduction

Soteria PasswordsNG is a new software development company looking to create a new kind of password manager. This new product must meet the highest security standards. We require a third-party assessment of our new password manager product.

This assessment should determine whether the product meets Sarbanes Oxley (SOX) and other cybersecurity compliance levels. That said, we are requesting proposals from able cybersecurity firms to conduct this assessment.

Problem

Soteria PasswordsNG is looking to create a re envision the password manager. The resulting product will be a flash drive that stores encrypted passwords. This device can be used with any compatible device. Once connected, a single Master Password will be used to decrypt and access the passwords.

Request

Soteria PasswordsNG is looking for a well established cybersecurity compliance contracting firm to conduct an assessment of our new password manager product. The contracting firm must be well respected in auditing cybersecurity compliance of various kinds.

The assessment window will be a month. The proposer should include an expected price in the proposal. This proposer should be ready to negotiate this price.

The assessment of this product should include and address the following:

<u>Security</u>	<u>Compliance</u>	<u>Methods</u>
Information assurance	SOX compliance	Deep security analysis
Design quality	NIST Cybersecurity Framework	Penetration testing
Infrastructure performance and security		Developer interviews and analysis

Conclusion

Soteria PasswordsNG is accepting proposal submissions. The best proposal will be chosen after consideration. Additional communication may be required before a selection is made.

Submit proposals to Proposals@Soteria.com. If there are any questions, contact our support center at Helpdesk@Soteria.com.
